

Data professional with 2+ years of hands-on experience building ETL/ELT pipelines, BI dashboards, and automated reporting solutions. Skilled in SQL, Python, Power BI, SSRS, and AWS with a strong foundation in data modeling and pipeline reliability. Pursuing MS in Data Science; eager to contribute to large-scale data infrastructure powering AI/ML-driven operational systems. Passionate about eliminating manual effort through scalable, automated data workflows.

TECHNICAL SKILLS

Languages & Query: SQL (advanced), Python, M Query, DAX, VBA
Pipelines & ETL: ETL/ELT pipelines, Power Query, SSRS, Databricks AWS (S3, Glue, EMR basics)
Data Warehousing: SQL Server, MySQL, data modeling, Dbeaver
BI & Visualization: Power BI, Tableau, Excel (Power Query, Pivot, VBA)
Platforms & Tools: AWS, SharePoint, UAT, Git (basics)

EDUCATION

MS, Data Science - University of Pittsburgh Expected 2027

BA, Information Systems | Minor in Marketing - University of Wisconsin, Eau Claire, WI

EXPERIENCE

UnitedHealthcare June 2024 - Present

Reporting | Sales Reporting Analyst (Current)

- Designed and deployed self-service Power BI dashboards adopted by enterprise stakeholders across Sales, Operations, and leadership, cutting ad hoc requests by ~70%.
- Built end-to-end automated report distribution via SSRS — pulling SQL data, converting to formatted Excel, and uploading to SharePoint on a scheduled deployment, eliminating all manual file sharing.
- Developed SQL queries in DBeaver to extract and process multi-million row database for field sales agent reporting, onboarding tracking, and territory performance
- Established implicit data quality controls by centralizing source queries and auto-refresh logic, ensuring stakeholders receive consistent, accurate data on schedule

M&R Sales | Sales Support Rotational Program

- Optimized SharePoint and Teams workflows to improve consistency and scalability of data delivery across the team.
- Improved field agent access to sales resources, reducing call center dependency and driving a ~30% decrease in inbound calls.
- Coordinated cross-functionally across Sales and Operations to ensure timely delivery of client-facing data.

Internships

Optum June 2023 - Aug 2023

Enterprise Shared services | Customer experience & Capabilities Intern

- Analyzed large-scale datasets to detect customer experience friction points, contributing to measurable reduction in downstream issues.
- Built dashboards surfacing key insights for leadership, accelerating data-driven decision-making.

UnitedHealthcare June 2022 - Aug 2022

Government Programs | Marketing Intern

- Analyzed campaign and customer satisfaction data to identify performance trends, informing marketing strategy adjustments and improving engagement metrics.
- Developed recurring KPI and customer satisfaction reports supporting data-driven decisions.
